The image shows a software interface for passport analysis. The main window displays a side view of a Swiss passport under white light, showing the internal structure of the pages and the binding. To the right of the main image is a data entry form titled "OCR-B Data" with fields for Passport Number, Surname, Name, Nationality, Sex, Date of Birth, Date of Expiry, Issuing State, Additional Data, and Age. Below the main image is a row of seven small thumbnail images representing different analysis views: WHITE, IR, UV, SmartChip, FP, FR, and Forensic. The "Forensic" thumbnail is highlighted with a yellow border. A green "VALID" button is located at the bottom right of the interface.
